

Event Management API Documentation

1.0.0 OAS 3.0

API documentation for the Event Management application

Servers

http://localhost:3000 - Local server

Authorize

Events

POST

/api/v1/events

Create a new event

Use this endpoint to add a new event with a name, date, capacity, and optional fields. Validation will check that all required fields are filled and meet the minimum requirements.

Parameters

Try it out

No parameters
